

A NEW ALBINO RASPBERRY.—Among specimens of *Rubus* collected on the wooded slopes of Caribou Mountain, Mason, Maine by Mr. Robert A. Ware, on July 24, 1919, and preserved in the herbaria of Mr. Ware and Mr. Walter Deane is a form of *Rubus idaeus* L., var. *canadensis* Richardson with amber-white or honey-colored instead of the usual red fruit. The "white"-fruited raspberry already known in New England is a form of var. *strigosus* recently taken up as *R. idaeus*, var. *strigosus* (Michx.) Maxim., forma *albus* (Fuller) Fernald, RHODORA, xxi. 96 (1919). The form discovered by Mr. Ware, being a variant of var. *canadensis*, should be called

RUBUS IDAEUS L., var. CANADENSIS Richardson, forma **Warei**, n. f., fructibus flavis.—MAINE: rich woods, slopes of Caribou Mountain, Mason, July 24, 1919, R. A. Ware (TYPE in herb. W. Deane).—WALTER DEANE and M. L. FERNALD, Cambridge, Mass.

*Vol. 22, no. 257, including pages 77 to 96, was issued 18 June, 1920.*
